

Sheepskin

➤➤ **Now sheepskin comfort comes made to fit**

The remarkable seat covers owners and pilots have been asking for are here.

100% genuine sheepskin covers. Designed and manufactured exclusively for the Cessna seat.

In terms of comfort, no man-made product comes close to the real thing. Sheepskin keeps you cool in the summer, warm in the winter. Its hollow fiber absorbs an amazing 30 percent of their own weight to keep both the user and the seat cover dry. At the same time, the seat upholstery is protected from the sun and daily wear.

Custom tailored to fit the Cessna seat like a glove ensures easy installation and a snug fit with no shifting or scooting during flight. And the design is as functional as it is comfortable, with easy access to the storage pockets in the back of the seats. Since the covers are manufactured utilizing the same materials used in production, color is a perfect match.

Put on something comfortable. With 100 percent sheepskin covers exclusively from Cessna.

Pebble (Tan)

Mink (Brown)
